

Helpful videos for the radio removal can usually be found at YOUTUBE.  
Search for car type, e.g. "Volvo V70" and "radio removal".

1. Before installation turn off ignition.
2. Please **connect** the bluetooth-adapter plug to the **CD-changer port** at the **backside of your radio** (see picture above).
3. The single yellow cable must be connected to **12V permanent plus**.
4. After installation and **before reinstalling the radio**, check if device can be selected as a **CD-changer (NOT AUX-IN)** at your radio. Therefor please **press CD-button several times** or use **Source knob**.
5. **Also check for Bluetooth connection**, therefor activate Bluetooth at your phone and search for new devices, you can **find the device** there as "**BlueMusic**". No PIN is needed for connection.
6. **Music starts automatically**, when choosing device as a CD-changer at your radio. **Manually** you can start music with **CD2** radio button ( „1-20 / DISC“ knob ). Music stops when switching to a different radio source.
7. Please set phone volume (music app) to 90-100%, to increase audio quality.

---

To **reset the paired device list (this can be useful with connection problems)** please double press the next track button at the radio. You hear a confirmation, when sucessfully done. This works only with no phone currently connected to "Bluemusic".
